Juan Romero

Associate Security Analyst | SOC Operations | CompTIA Security+ | Network+
Brownsville, TX | (956) 543-1981 | romerocharlie1031@gmail.com | U.S. Citizen

PROFESSIONAL SUMMARY

Cybersecurity senior (B.S. expected December 2026) with CompTIA Security+ and Network+, a self-built Wazuh SIEM lab, and hands-on alert triage and escalation experience from bank fraud investigation. Resolve 60+ security and access tickets per day in a hospital IT environment, documenting every case to HIPAA audit standards. Available for 24x7 and rotating shift schedules.

SKILLS

Security Operations: SIEM monitoring, alert triage and escalation, incident documentation, event timeline reconstruction, detection and alert tuning, vulnerability scanning, MITRE ATT&CK
Security Tools: Wazuh SIEM, Wireshark, Snort IDS, Nmap, Nessus, Rapid7, Burp Suite, FLARE VM, REMnux, Ghidra
Systems, Networking, Ticketing: TCP/IP and common Internet protocols, Windows, Linux, Active Directory, ServiceNow, firewall rule design and testing (Google Cloud)
Scripting: Python, Bash, PowerShell

CERTIFICATIONS

CompTIA Security+ (SY0-701) | CompTIA Network+ (N10-009) | CompTIA CySA+ (in progress, exam expected November 2026)

EXPERIENCE

IT Support Specialist I, Prime Healthcare, Harlingen Medical Center — Harlingen, TX | July 2026 – Present
- Resolved 60+ end-user security and access issues per day through ServiceNow, managing Active Directory accounts and permissions to restore staff access to hospital systems.
- Shadowed the email security and incident response teams on suspicious-email and security incident investigations, learning how each case is analyzed and handled.
- Documented every ticket with complete evidence trails, supporting HIPAA privacy and security compliance and audit readiness.

Customer Expert I, Fraud Dept., Teleperformance (Bank of America) — Brownsville, TX | June 2025 – June 2026
- Triaged flagged account activity from a high-volume queue (60+ customer calls per day), following documented procedures to classify each case as legitimate, fraudulent, or requiring escalation.
- Reconstructed event timelines to identify anomalies and escalated cases to senior reviewers with supporting evidence for faster decisions.
- Documented findings to meet audit trail and compliance requirements while protecting sensitive data under time pressure.

Cybersecurity Mentor, TX-CYPHER — Edinburg, TX | October 2025 – March 2026
- Guided camp members through hands-on security labs and coached them through configuration issues so they could complete each lab.
- Wrote clear troubleshooting explanations for non-technical audiences, building their confidence with security tools.

PROJECTS

SIEM and Alert Triage Home Lab (Wazuh)
- Deployed and administer a Wazuh SIEM on a Raspberry Pi for log collection, alerting, and monitoring across simulated endpoints.
- Wrote Python and Bash scripts to automate log parsing and alert tuning, speeding identification of anomalous activity.

Network Traffic, Intrusion Detection, and Vulnerability Labs
- Tested Snort IDS rules, analyzed packet captures in Wireshark, and ran Nessus and Rapid7 scans to assess IoT device vulnerabilities.
- Analyzed EternalBlue and WannaCry samples with static (PEStudio, Ghidra) and dynamic (REMnux) analysis; built a LAMP-stack phishing simulation.

IoT Sentry: Portable IoT Security Auditing Tool (Capstone)
- As hardware lead and architect of a four-person team, built a Raspberry Pi Zero 2W device combining UART/SPI auditing, Nmap discovery, and MAC/OUI fingerprinting, feeding a FastAPI/SQLite backend and dashboard.

Vulnerability Disclosure Research (HackerOne)
- Found that session cookies did not change on refresh, allowing sign-in to a second test account; reported it responsibly and was credited as an independent researcher.

EDUCATION

University of Texas Rio Grande Valley — B.S. in Cybersecurity | GPA 3.23 | Expected December 2026
Coursework: Intrusion Detection, Data Communication and Networking, Cloud Security, Cryptography
